

AI-POWERED DAILY JOB MATCHING

Hireschema

The AI Scout that finds your next role — every morning.

BUSINESS OVERVIEW

Confidential · May 2026

● THE PROBLEM

Job search is broken at three layers.

0 1

VOLUME

250M+

jobs posted yearly. Candidates see ~50/day, ignore 90% of them.

0 2

NOISE

60%

of "remote" roles are silently region-restricted or hybrid in disguise.

0 3

FRICTION

5+ hrs

per week researching jobs before a single application is even written.

● THE SOLUTION

An AI Scout that runs your job search overnight.

Every morning, Hireschema delivers a short list of high-fit, region-eligible, ranked roles — already filtered, scored, and enriched with the tools you need to apply.

1

DAILY MATCHES

10 high-fit roles by 7 AM, local time.

2

REGION-AWARE

No more "Remote — US only" jobs in an India inbox.

3

LEARNS FROM YOU

Saves, dismisses, applies — all tune tomorrow.

4

AI COPILOT

Tailored resume, cold email, interview prep, salary.

What the user actually gets.

DAILY MATCHES

10 / day

Ranked, deduped, region-aware. Email + dashboard.

AI COPILOT

4 actions

Cold email · Tailored resume · Interview prep · Salary data.

JOB TRACKER

5 states

Saved > Applied > Interviewing > Offered > Rejected.

EXPORTS

PDF · DOCX · MD

Tailored resume in any format. Gmail compose, one click.

From signup to your next offer.

1

Sign up

Google OAuth · upload your resume.

2

Profile extracted

AI summarises skills, suggests career paths.

3

Scout runs daily

Live web search at 7 AM local timezone.

4

Matches delivered

Email + dashboard — ranked, enriched, ready.

5

You act

Save · apply · ignore. AI helps with each.

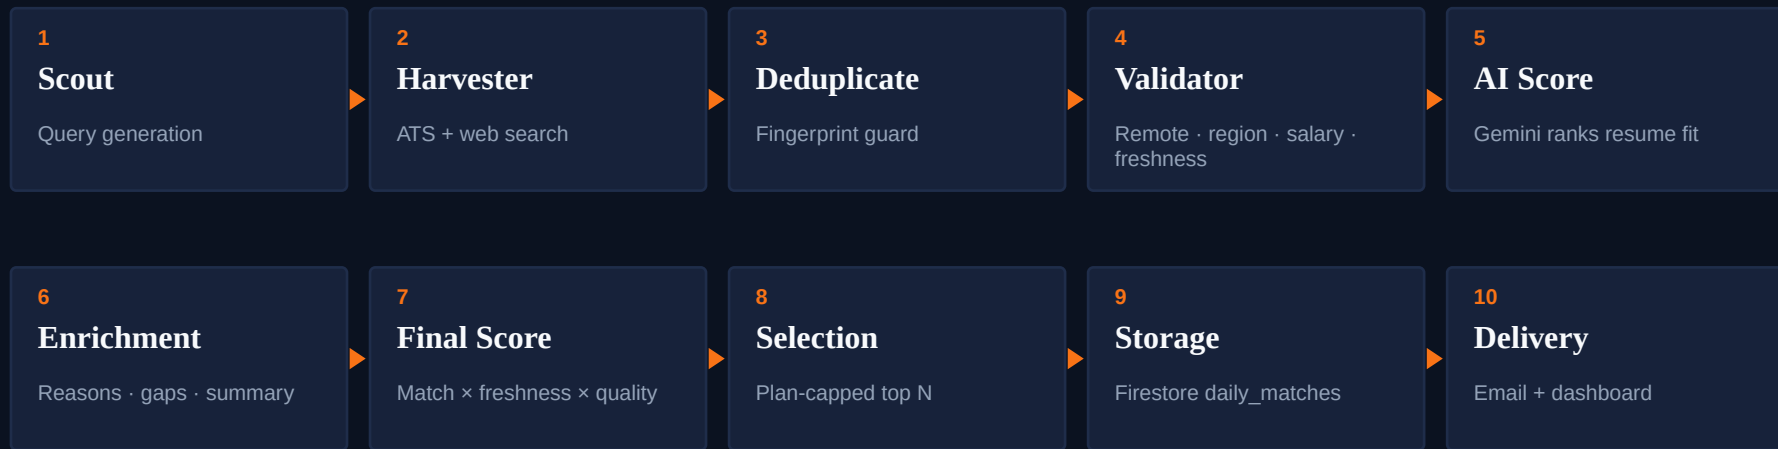

6

Engine learns

Tomorrow's matches get sharper. Compounding.

Strict pipeline. No stage may compensate for another.

Enforced by code. Every job passes deterministic validation before AI scoring runs.

Three tiers, one AI gateway.

CLIENT

React Dashboard

- › React 19 + TS
- › Vite + Tailwind v4
- › Firebase Auth (Google)
- › Reads daily_matches

API

Vercel Functions

- › Cron: daily-alerts › process-user
- › On-demand: /api/jobs/trigger
- › Admin endpoints
- › OpenRouter proxy

STORAGE

Firestore + Auth

- › users/{uid} profile + signals
- › daily_matches/{YYYY-MM-DD}
- › trackedJobs (5 states)
- › admin_logs + cronRuns

AI GATEWAY

OpenRouter

WEB SEARCH

Perplexity + Gemini

ATS DIRECT

Greenhouse + Lever

Right model for each job. All via OpenRouter.

Cost-optimised: cheap models for high-volume structured tasks; premium models for user-facing writing.

TASK	MODEL	WHY
Query generation	gpt-4o-mini	Cheap, fast structured output
Job scoring	gpt-4o-mini	Batch-friendly, low cost
Resume summary	gemini-pro-1.5	Long-context reasoning
Resume extraction	gpt-4o	High-fidelity JSON schema
Email + resume	claude-3.5-sonnet	Tone + grounding
Interview + salary	claude-3.5-sonnet	Coaching-quality output

Boring tools where boring is best. Modern where it matters.

FRONTEND

React 19 · TypeScript · Vite · Tailwind v4 ·
Shadcn/ui · React Router v7

BACKEND

Vercel Functions · Firebase Admin · Express (dev) ·
TypeScript end-to-end

AI / DATA

OpenRouter · OpenAI SDK · Firestore · Firebase
Auth · Resend · Apify

TOOLING

Vitest (139 tests) · tsc strict · html2pdf.js · docx ·
pdfjs-dist

Four invariants competitors break every day.

NO FAKE JOBS

Every listing sourced from live web search. No synthetic content, no padded inventory.

REGION-AWARE REMOTE

"Remote — US only" is filtered out for non-US users. Timezone is the truth signal.

ANTI-SLOP AI

No "I am excited to apply" emails. Anti-slop validation rejects generic AI output.

LEARNING LOOP

Every save, dismiss, click feeds back into Scout. The product improves with use.

Cost per Pro user, per month.

Estimated from current architecture. Pending real-traffic validation.

COMPONENT	COST
OpenRouter (AI inference)	\$3.00
Apify (web scraping)	\$0.10
Vercel (functions + edge)	\$0.10
Firestore + Auth	\$0.05
Resend (email)	\$0.01
TOTAL COGS	\$3.26

FREE TIER COGS

~\$0.30

1 match/day, no premium AI tools triggered.

PRO GROSS MARGIN

~83%

At \$19/mo Pro. Beats most B2C SaaS.

● PRICING

Three tiers. Free leads to Pro. Pro leads to Team.

FREE

\$0

forever

- 1 match per day
- Basic AI Copilot
- Job tracker
- No region filtering

RECOMMENDED

PRO

\$19

per month · \$190/yr (2 free)

- 10 matches per day
- Full AI Copilot
- Region-aware sourcing
- Learning loop on
- Unlimited tracker
- PDF / DOCX exports

TEAM

\$79

per seat / month

- Recruiter / talent-pool tools
- Shared tracker
- Bulk outreach
- Analytics + reporting
- SLA + priority support

● PROJECTIONS

What scale looks like.

Pro tier at \$19/mo · ~83% gross margin · assumes Free > Pro conversion of 3–5%.

● PRICING RATIONALE

Why \$19 / month is the right Pro anchor.

PRODUCT	PRICE	POSITION
LinkedIn Premium	\$39.99 / mo	Ceiling
Teal+	\$29 / mo	Tracker-led peer
Final Round AI	\$29 / mo	AI interview niche
Huntr	\$16 / mo	Floor
HIRESHEMA PRO	\$19 / mo	Best ratio

WHY \$19

- Below LinkedIn Premium — captures "professional tool" budget.
- Above pure trackers — justifies AI Copilot premium.
- Round number reads as "small monthly habit."
- At ~83% GM, supports paid CAC up to ~\$60.
- Annual at \$190 anchors retention.

LAUNCH LADDER \$15 intro (first 100) > \$19 standard > \$29 power tier with auto-apply (2027).

Shipped. Next. Later.

SHIPPED

- Daily AI matches (10/day Pro)
- AI Copilot (4 actions)
- Region-aware remote filter
- Job tracker + saved jobs
- Anti-slop validation
- PDF / DOCX / MD exports

NEXT — Q3 2026

- Scout query bias for non-US users
- Recruiter contact extraction
- Auto-follow-up sequences
- Salary negotiation coach
- Mobile-first PWA

LATER — 2027

- One-click auto-apply
- Team / recruiter tier
- Multi-region sourcing
- Referral graph (warm intros)
- Embedded coach (1:1 calls)

Built. Tested.

Ready to find users.
