

H I R E S C H E M A

Hireschema.

The AI job-search operating system for remote workers.

THE PROBLEM

Remote job search is broken.

- Job seekers spend 5+ hours a week scrolling listings across LinkedIn, Indeed, and dozens of ATS portals.
- “Remote” jobs are silently region-locked — a candidate in India keeps seeing US-only roles they can’t apply to.
- Tailoring resumes, drafting cold emails, and prepping for interviews are all manual, repetitive, and slow.
- Existing tools (LinkedIn, Otta, Wellfound) are job feeds — not a job-search operating system.

THE SOLUTION

One guided loop — from resume to interview.

- 1 Upload resume (once).
- 2 Confirm 3 career paths (AI suggests them).
- 3 Scout runs automatically — every morning and on demand.
- 4 See daily matches filtered for your region.
- 5 Save best job — AI application kit auto-generates.
- 6 Apply, send, track status — all in one place.

Activation event = user saves a real match AND generates an application asset.

THE ENGINE

Eight-stage matching engine.

- 1 **Generate Queries** AI builds search queries from resume + career paths.
- 2 **Harvester** Pulls jobs from Greenhouse, Lever, Apify, Perplexity, LinkedIn.
- 3 **Deduplicate** Fingerprint matching across runs to avoid repeats.
- 4 **Hard Filters** Remote-only, region eligibility, salary floor, freshness ($\leq 7d$).
- 5 **AI Enrichment + Scoring** Gemini scores each job against the candidate's resume.
- 6 **Final Ranking** Blend of AI fit + freshness + ATS quality + hot signals.
- 7 **Threshold + Selection** Unseen jobs preferred. Top-N kept for the day.
- 8 **Persist to Firestore** Daily snapshot for instant load on the dashboard.

Pipeline runs nightly via GitHub Actions cron + on-demand via Vercel API.

AI COPILOT

Four one-click assistants per matched job.

Cold Email

Personalised outreach that opens in Gmail with a tailored resume attached.

Tailored Resume

ATS-aware rewrite, downloadable as PDF or DOCX.

Interview Prep

Role-specific question bank with model answers.

Salary Insights

Market-data-grounded compensation guidance.

Every asset is editable and persisted to the tracked job.

DIFFERENTIATOR

Remote means actually remote — for the candidate's region.

- Most “remote” listings have hidden geographic restrictions (“Remote — US only”, “EST timezone”).
- Hireschema parses each listing's location string + job description for region clauses.
- Cross-references against the user's country, derived from resume + timezone.
- Filters ineligible roles at three checkpoints: query, harvest, and read-time.

An India-based candidate sees **zero** US-only “remote” roles. Period.

TECH STACK

Pragmatic, modern, deployable today.

Frontend

- React 18 + TypeScript
- Vite 6 build
- Tailwind CSS v4
- framer-motion, lucide-react
- html2canvas-pro + jsPDF + docx

Backend / Infra

- Vercel serverless API
- Firebase Firestore (data)
- Firebase Auth (users)
- GitHub Actions cron — nightly Scout
- Vercel hosting + CDN

AI / Data

- OpenRouter (Gemini 2.0, GPT-4o, Claude)
- Apify scrapers
- Greenhouse + Lever ATS APIs
- Perplexity for live-web augmentation
- Resume-aware AI scoring

STATUS

MVP is in production.

- ✓ 4-step onboarding wizard with AI career-path suggestion.
- ✓ Full Scout pipeline running daily.
- ✓ AI Copilot — email, resume, interview, salary.
- ✓ Editable resume profile — contact, experience, education, skills, AI analysis.
- ✓ Saved-jobs pipeline with status tracking.
- ✓ Region-eligibility filter — US-only roles now hidden from India users.
- ✓ PDF + DOCX resume export.
- ✓ Getting Started checklist driving activation.
- ✓ SuperAdmin dashboard for ops.

UNIT ECONOMICS

Lean cost structure.

Monthly infra (estimate)

OpenRouter (AI calls)	\$80 – \$250
Apify scrapers	\$50 – \$150
Vercel Pro	\$20
Firebase Blaze	\$10 – \$60
Domain + misc	\$5

Total ~\$165 – \$485 / mo

Per active user @ 1,000 MAU

AI	\$0.15 – \$0.35 / user / mo
Infra	\$0.05 / user / mo

\$0.20 – \$0.40

blended per user / mo

Estimates based on observed token usage and current per-user query volume. Drops further with caching + cheaper-model routing.

P R I C I N G

Free funnel → Pro conversion.

FREE

\$0 / mo

- 1 fresh match per day
- 1 saved job slot
- 1 AI Copilot run per day
- Daily email digest

PRO

\$19 / mo · or \$144 / yr

- 10 fresh matches per day
- Unlimited saved jobs + pipeline tracking
- Unlimited AI Copilot (email, resume, interview, salary)
- PDF + DOCX exports
- Priority Scout runs — on-demand any time
- Region eligibility + advanced filters

Target conversion: **5 - 8%** of activated users at 1k MAU → **\$1k - \$1.5k MRR**. Scales linearly.

ACTIVATION

Activation drives retention.

Activation = (saved real match) AND (generated or viewed an application asset).

1**Onboarding wizard**

95% upload-to-first-match completion (instrumented).

2**Getting Started checklist**

Drives users from passive to activated.

3**Pipeline + asset persistence**

Daily-return habit — each role re-engages.

Every tailored resume carries a “Generated by Hireschema” footer — built-in word-of-mouth.

ROADMAP

What's funded next.

- 1 Make topbar Scout CTA functional everywhere.
- 2 Inline Save on dashboard cards.
- 3 Replace /saved with the richer Pipeline experience.
- 4 Persist all generated assets to the tracked job.
- 5 Stronger onboarding wizard with progress feedback.
- 6 Activation analytics — cohort dashboards for ops.

Each block ships independently. Validates the funnel before scaling spend.

Hireschema.

An operating system for remote job-seekers — not another feed.
